BNB-SC POWERED KEN (R&D)
STATUS: UNDER DEVELOPMENT
MAXIMUM SUPPLY: 100,000KEN

PROJECT HIGHLIGHTS

Prepared by: Prof. Ahmad Bilal Khan	Founder & CEO	Knowledge Gateway

Capsule Summary

Knowledge Gateway is primarily a school teaching finance and commerce to the enrolled students and providing consultancy services to the subscribers. KGS has been operative since March, 2019 and has been a pioneer in offering education on the most recent technologies and providing out of the box solutions to help businesses grow. Team KGS is passionately working on the following now:

HyFi	HyCom	BDAI
Bridging System	**Bridging System**	**Backbone technology**
Enabling the world to manage centralized and decentralized finance keeping both entities intact and managing books separately for compliance.	We have the payments and record keeping solutions for all the businesses enabling them to connect to the world of web3 with ease and comfort.	Decision support system is being strengthened with our AI powered big data analysis. A lot more including market analysis can be performed using BDAI

Our Vision

KOHENOOR is working on finance and commerce integrating the existing models with the power of AI supported big data analysis that will be helpful in making quick decisions and providing the world with the power to choose.

Our Aim

KOHENOOR is the most prestigious project of Knowledge Gateway. The project aims to produce innovative financial and commercial solutions in the ever evolving technological landscape. KGS established a team of mentors who are not only teaching and providing consultancy but also working devotedly to devise a fully functional and automated system to operate in the realms of centralized and decentralized ecosystems.

Recent Developments

- The project is now in the final stages initial development phase
- Pilot testing of HyFi, HyCom and BDAI is underway
- Audit systems are being devised by Chartered Accountants and Management Scientists
- Options for payment gateways are being explored for teaming up
- System testing has been enforced at Knowledge Gateway at organizational level
- Organizations operating on centralized models are offered decentralized version for testing
- Organizations operating on decentralized models are offered centralized version for testing
